PROFESSIONAL SUMMARY

Full-stack web developer experienced in building responsive SaaS applications, operational dashboards, business websites, and database-backed workflows using **Next.js, React, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Git/GitHub, Playwright, Vercel, and Netlify**. Currently developing **Event Core**, a multi-module hall and event management SaaS platform, and has also worked on the **Lux Kitchens** website and inquiry automation workflows. Uses **ChatGPT, OpenAI Codex, Claude, and Base44** to accelerate prototyping, debugging, refactoring, testing, and implementation while reviewing and validating production code. Background in IT support and image/data annotation adds strong troubleshooting, documentation, quality-control, and client-communication skills.

CORE TECHNICAL SKILLS

Frontend: Next.js, React, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive UI, Component-Based Architecture

Backend & Data: Supabase, PostgreSQL, Authentication, CRUD Workflows, SQL, REST API Basics, Row-Level Security Concepts

Testing & DevOps: Playwright, Git, GitHub, Pull Requests, Branching Workflows, Vercel, Netlify, npm, VS Code

AI-Assisted Development: ChatGPT, OpenAI Codex, Claude AI, Base44, Prompt-Driven Prototyping, Debugging, Refactoring, Test Generation

Support & IT: Windows Troubleshooting, Hardware/Software Support, LAN/Network Basics, User Account Support, Ticket Documentation

PROFESSIONAL EXPERIENCE

Freelance Full-Stack Web Developer

2026 - Present

Remote | New York-based Client

- Develop and maintain Event Core, a multi-module hall and event management SaaS platform using Next.js, React, TypeScript, Tailwind CSS, Supabase/PostgreSQL, Playwright, Git/GitHub, Vercel, and Netlify.
- Build responsive dashboards and workflow modules for bookings, calendar availability, event management, kitchen operations, dining/seating, hall layouts, billing, reports, vendors, staff roles, permissions, and platform settings.
- Implement database-backed features including authentication flows, CRUD operations, form handling, persistence, role-aware workflows, and operational management screens.
- Translate client conversations and real venue-operation requirements into implementation plans, UI behavior, workflow decisions, and production-ready features.
- Use Playwright to validate critical flows including mutation, persistence, menu-selection, and dashboard interactions; troubleshoot frontend, backend, database, and deployment issues.
- Collaborate through GitHub branches, pull requests, commits, merges, and hosted deployment workflows, while using ChatGPT, Codex, Claude, and Base44 for AI-assisted development and personally validating generated code.

IT Assistant Intern

Jan 2025 - May 2025

Mansfield International, Inc.

- Provided technical support for Windows computers, hardware/software issues, user accounts, system updates, and basic LAN/network troubleshooting.
- Documented incidents and support work clearly, helping track issues and maintain consistent troubleshooting procedures.
- Assisted with database-related tasks and built or maintained basic HTML, CSS, and JavaScript pages.
- Worked with PHP and SQL on an internal payroll-system project, strengthening practical understanding of business applications and database workflows.

Online Labeler / Image & Dataset Annotation

Jan 2024 - Sep 2024

AtinData, Inc. | Remote

- Annotated images and datasets according to project-specific guidelines with a strong focus on accuracy, consistency, and quality control.
- Reviewed labeling work carefully, followed detailed instructions, and corrected inconsistencies before submission.
- Met deadlines in a remote environment while maintaining reliable output across repetitive, detail-sensitive tasks.

FEATURED PROJECTS

Event Core - Hall & Event Management SaaS Platform

Next.js | React | TypeScript | Tailwind CSS | Supabase | PostgreSQL | Playwright

- Full-stack SaaS platform for managing bookings, events, kitchen production, dining and seating, hall layouts, billing, reports, vendors, staff, permissions, and settings.
- Built responsive operational dashboards and workflows for both desktop and mobile use, including Hall Room Map, Dining Manager, reusable hall presets, and kitchen-only production jobs.
- Worked with authentication, PostgreSQL persistence, forms, CRUD operations, role/permission concepts, and Playwright mutation-flow testing.
- Supported version control and deployment through GitHub, Vercel, and Netlify.

Lux Kitchens - Website & Inquiry Automation

Base44 | Supabase | Form Validation | Email Workflows

- Worked on a bespoke kitchen and cabinetry website with lead-capture and inquiry workflows tailored to project consultations.
- Implemented Supabase-backed data/settings, contact validation, project-type and project-stage fields, and structured inquiry details.
- Built automated contact-notification and customer auto-reply workflows so submitted form details are routed to the appropriate recipient and confirmed to the customer.
- Improved the reliability of form-to-email data handling by testing payloads and ensuring submitted customer details were used instead of placeholder information.

EDUCATION

Bachelor of Science in Information Technology

Graduated Jul 2025

Colegio de Montalban

GWA: 1.50

Information and Communications Technology (ICT)

Graduated Mar 2020

Asian Institute of Computer Studies

GWA: 1.75

Target Roles: Full-Stack Web Developer | Frontend / Next.js Developer | Website Developer | AI-Assisted / Vibe Coding Developer
